

Heads Up™ is the first EPA registered biological, tested and proven to:

- Increase plant health
- Improve root development
- Shown to have consistent yield bump under disease pressured conditions
- Added control over Fusarium, Rhizoctonia and other fungal and bacterial diseases
- Suppress Sudden Death Syndrome (SDS) and full season White Mold
- Compatible with any seed treatment and/or inoculant
- Is safe for both the user and the environment
- OMRI approved for organic use

A low cost plant health insurance. It's a vaccine for your plant that is systemically active for full-season plant health and disease suppression.

EPA registered for use on:

- Soybeans
- Dry beans
- Corn
- Wheat

Reduces White Mold infection by 62% and severity by 38%. Reduced SD infection by 14% and severity by 16%.

Use Rate:

58 grams (1 package) treats 400 units of soybeans.

Product is mixed in jar w/water then added to Solution.
